120 Mile Range

Combined Charging System
Fully charged within 1.5 hours
with 30kW DC Charger

Zero Emissions

More energy-efficient, more powerful, cleaner, more environmentally-friendly:
This is green power at its best with advanced technology placing it ahead of its time.

+ **Interactive high-tech integrated dashboard system**
Not only leading the trend with futuristic design, but also easy-to-read by displaying all data you need

+ **The most advanced pure electric power system**
Large capacity 56kW lithium ion battery + permanent magnet synchronous motor + smart motor controller brings highly-efficient and stable power supply

+ **Digital intelligent CVT**
Intelligent Power Control System: automatically adjusts the torque and output power to the motor under different conditions

+ **Electric Park Brake System**
Convenient and reliable
Extending the lifespan of parking components

The exterior is aerodynamically designed, helping reduce wind resistance and vehicle weight using a large number of aluminium alloys and polymer composites. It provides high-voltage power-off protection through national collision regulations. The width of the compartment is 1706 mm. The cargo box is square and the loading and unloading are optimal. The short axis of the car can reach 5 cubic meters; the long axis can reach 6.3 cubic meters. Provides DC + AC dual charging mode DC mode:45 minutes can charge 80% of electricity, 80 minutes can be charged to 100% of electricity. 35kWh battery life up to 280km; 52.5kWh battery life up to 400km; fast charge mode charging 45 minutes up to 80% power. High power low energy motor. The maximum power is 70kW; the peak torque is 220Nm; the acceleration time of 0-50km/h is 5s; the maximum grade is 30%, which is tailored for urban conditions. It is equipped with SAIC Maxus self-developed intelligent interconnection system----Spider Zhilian, in addition to the network connection service, it also realises the data interconnection and intercommunication between enterprise management APP and WEB.

Roadside Assistance: LDV Assist

LDV Assist support teams are on-call and available 24 hours a day, 365 days a year, right across the UK and Ireland. LDV Motor Rescue will be there for you if ever you run into a problem on your journey. A complete LDV Motor Rescue information booklet is provided in every new LDV vehicle.

FLEXIBLE FINANCE

TAILOR-MADE FINANCE SOLUTIONS TO KEEP YOUR BUSINESS ON THE ROAD

LDV offers bespoke finance packages to suit your budget. Smaller up-front costs and manageable monthly repayments make your next vehicle even more accessible. Our flexible finance options include finance lease, which allows you to spread the VAT payments over the course of the agreement. At the end of the lease you have several options including continuing to use the vehicle by paying nominal rentals or part exchange for a new vehicle.

Warranty: LDV Peace of Mind

To give you even greater peace of mind, every new LDV vehicle sold through our dealer network comes with a comprehensive five-year warranty package*.

This means that if you encounter any problem during this period caused by a manufacturing fault, we'll sort it out free of charge. A complete warranty information booklet is provided in every new LDV vehicle.

**Five year warranty ~ 125,000 miles (Whichever comes first)
60,000 miles (Whichever comes first) - EV80 Range*

Want to own the vehicle? We also offer hire purchase agreements where the contract length, deposit amount, and frequency of repayments can be tailored to suit your cash flow. You also have the option of a balloon rental which further reduces your monthly payments. To request a tailored finance quote, talk to your local LDV dealer today.

MANUFACTURER

SAIC, the name behind LDV, is the largest automotive company in China. Based in Shanghai, SAIC produces almost seven million vehicles each year for both domestic and international markets and is a Fortune Global 500 listed company with almost 200,000 employees.

The company has a number of well-known brands within its portfolio including, since 2010, the acclaimed LDV range of LCV's. By 2020, SAIC will have invested more than €2bn in LDV and investment into R&D circa \$7.5 Billion, with a strong focus on safety, innovation and the introduction of new products to the range, including a suite of EVs that are already setting the standard for the future of eco-fuelled commercial motoring.

DISTRIBUTOR

The Harris Group is known throughout the UK and Ireland as a leader in the commercial vehicle sector. One of Ireland's most respected and long-established automotive distributors, the Harris Group has developed an unrivalled reputation for service excellence, which comes from more than fifty years of experience.

Harris is the distributor for the LDV range of vehicles in the UK, Ireland, Channel Islands, Isle of Man, Malta and Cyprus. Following a high-profile re-launch of the LDV brand in 2016, Harris has developed and is continuing to build a strong dealer network across all right hand drive markets in Europe.

BRIGHT FUTURE

LDV is the name for high-quality vehicles that offer a range of options to suit every delivery need. And now, with a newly-launched series of light commercial electric vehicles from which to choose, with LDV you can future proof your fleet whilst relegating hefty congestion charges, road fund licence and carbon emissions to the past.

At LDV, innovation is our world. Our focus is firmly on the future and that future means state-of-the-art technology and an emphasis on alternative fuels such as EV, Hybrid and Hydrogen.

LDV Disclaimer:

Images shown in this brochure are for illustration purposes only. Actual vehicles may differ and are subject to change.

Specifications, standard equipment, options, fabrics and colours are subject to change without notice.

Some features may be unavailable when your vehicle is built. Some vehicles are pictured with options that may be available at extra cost or may not be available on certain models. Ask about availability of options and verify that the vehicle you ordered includes the equipment you ordered.

*5 year/125,000 mile warranty and 5 years roadside assistance. Terms and conditions apply.

TECHNOLOGY

SAIC are leaders in the technical revolution, continually leading the way in the development of new technology and solutions for the automotive industry. Significant investment allows SAIC to bring us some of the most advanced vehicles in their class, with a strong focus on reducing environmental impacts. Technology is driving all of our futures and LDV is leading the charge.

TRUST

Trust is the foundation on which LDV's success has been built. Trust is built on consistency and our customers trust us to deliver on quality, safety, specification and price, every time.

AMBITION

We are nothing if not ambitious and LDV's impressive line-up of vehicles together with our plans for the future are a testament to the scale of our ambition.

The VM Eco-D 2.5 engine powers the LDVV80. Its highly regarded reputation has made this engine standard equipment in many international vehicle brands around the world, making it a solid choice for the LDVV80. VM Motori is based in Cento, Italy and brings Italian flair and innovation to the V80 project.

VM Motori Eco-D 2.5L turbo diesel engine with:

- Bosch electronically controlled common rail direct fuel injection system

Driver and passenger deep door storage
and over head storage
Integrated cup holders

A MULTITASKING VAN.

When you're working on location it is extremely important to be able to move a full crew and their tools as efficiently as possible to keep costs low and meet every deadline. Our crew cab allows you to move seven of your crew in the comfort of a V80 with all the standard features of the panel van. The CrewCab shares the same variants as the panel van, low roof, medium roof and high roof, meaning you will still have more than enough space to move the cargo you need. The high roof model even has enough space to allow for adult standing space. Clever under rear seat design allows for the maximum use of cargo space.
