**RENAULT**  
Passion for life

# Renault ZOE

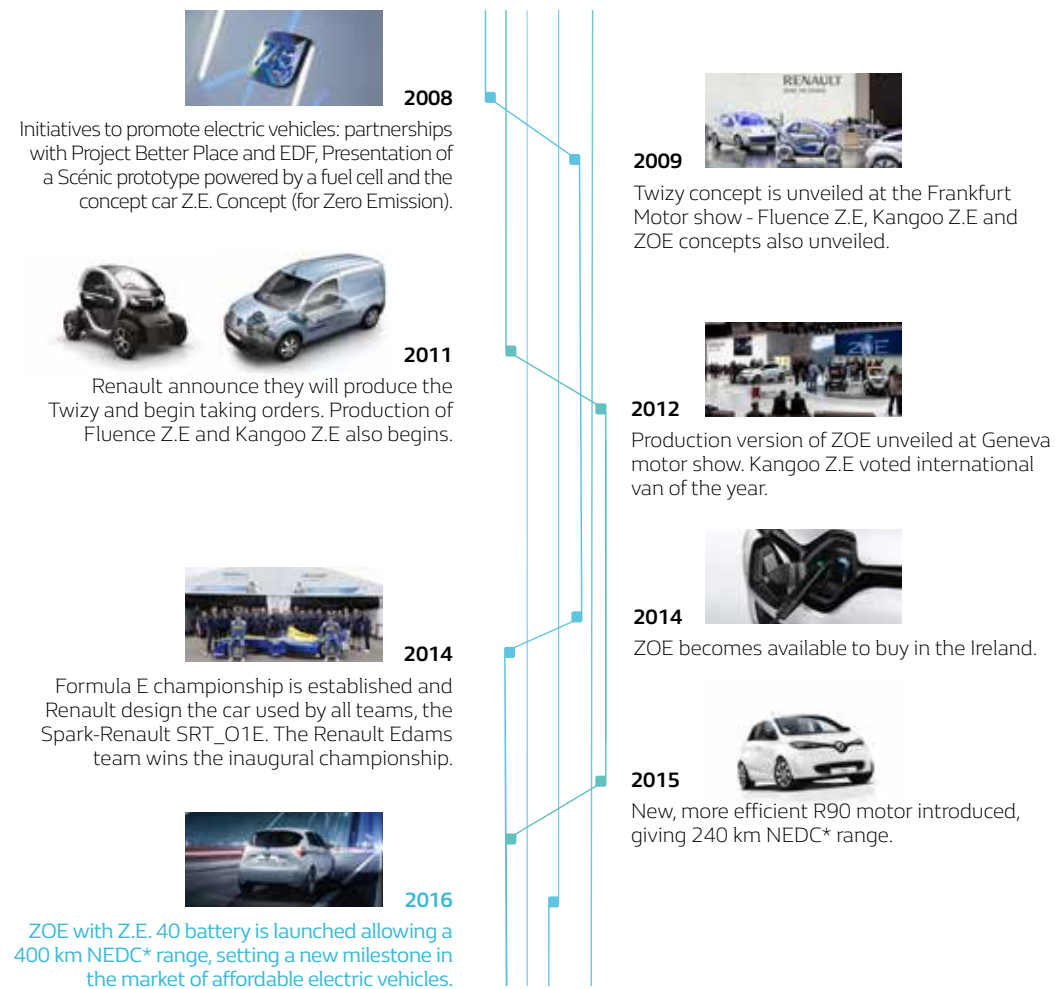

Z.E.

# Simply revolutionary...

Rediscover the pleasure of driving, with Renault ZOE. With cutting edge technology, and a revolutionary range, join the electric revolution.

\*Homologated range according to NEDC test cycle, for comparison purposes, 400 km, and may not reflect real life driving results. See Driving Range page for more information.

# Renault Zero Emissions

## Always a step ahead

Renault Z.E. has been pushing the boundaries of innovation since revealing the Z.E. concept car in 2008. Since then, we have been fulfilling our commitment and developing our technology so that our vehicles stay at the front of the electric vehicle market. Finally, in 2017, we have launched ZOE with the Z.E. 40 battery, that gives ZOE revolutionary 400 km NEDC range\* – a true milestone in affordable electric vehicles.

## First place on the track - first choice on the road

Our commitment to electric motoring innovation runs deeply in Renault's brand DNA. We were a founding partner in Formula E™, the FIA's newest race series. Winning the team championship in 2014/15 and 2015/16 seasons, along with the driver's championship in 2015/16, proves superior electric technology on the track and, as Europe's number one selling EV brand\*\*, on the road.

## Easy Electric Life

Electric mobility does not have to be more complicated than fuel-powered cars.

Far from it, electric power comes as second nature in most areas of our lives - have you ever thought about filling up your smartphone with fuel? Your car does not need to be very different from a phone. Simply put it on charge before you go to sleep, and you know it will be ready for you in the morning.

## The ZOE Experience

We were amongst the first manufacturers to launch a range of affordable 100% electric vehicles.

Because we have years of experience helping customers to integrate electric vehicles into their lives, we are now more than ready to make the electric revolution easy and accessible for everyone. And we have a community of happy ZOE customers to prove it. See the **Will the ZOE fit my lifestyle?** page to see what they think.

## Electric identity

A chrome diamond on a wide, black radiator grille, streamlined blue-tinted headlamps and transparent rear lights with concentric blue edges give ZOE a strong electric identity.

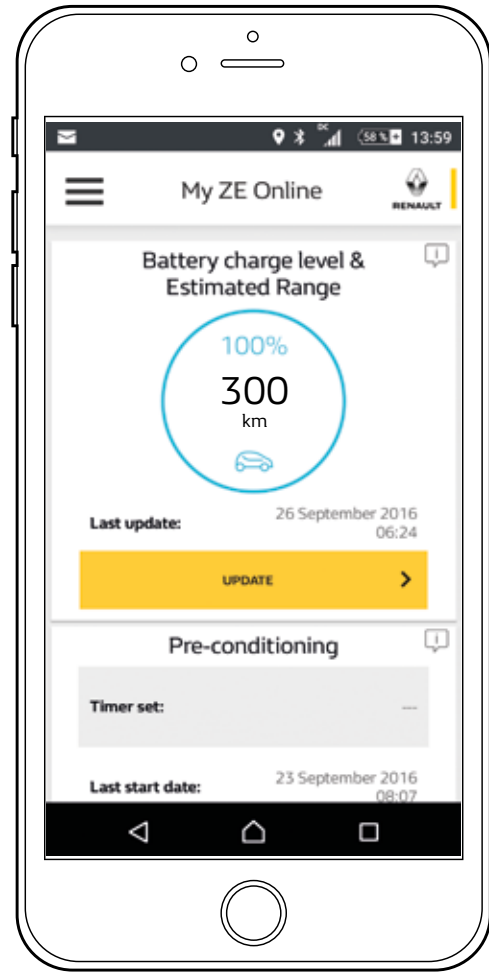

## Effortless, clean styling throughout

ZOE has the stylish appearance of a coupe thanks to built-in rear door handles, which have been branded with the designer's fingerprint. Combined with an interior design that is thoughtful and spacious, ZOE offers the best of both worlds.

Model shown ZOE Dynamique Nav with optional blue interior touchpack

# Technology and innovation

## Z.E. Connected Services

To keep you and your ZOE in sync, there are two Z.E. Connected Services available. These can be controlled using a smartphone or computer.\*

**My Z.E. Connect.** Remotely monitor your battery charging status.

**My Z.E. Interactive.** Remotely charge your battery, pre-condition your car so it's at the desired temperature before you start your journey and set a charging schedule to make the most of off-peak energy tariffs.

\* 3 years free subscription of Z.E. Connect on all models and 1 year free subscription of Z.E. Interactive for Dynamique Nav and Signature Nav. Z.E. Connected Services is compatible with Apple iOS® and Android® devices and is available in the App store and Google Play® store.

## Renault R-Link

The Renault R-Link multimedia system delivers an enriched driving experience and is tailored to your ZOE. The intuitive and touch sensitive 7" screen is extremely easy to use and there are a range of apps dedicated to motoring available to purchase as well as the ability for Bluetooth® audio streaming and hands-free calls.\*

**ZOE driving range and charging points**  
You can easily view the current driving range, how efficient your driving is and also locate the nearest charging points.

**Make hands-free phone calls**  
Manually enter numbers or use your contact list to make and receive calls whilst you concentrate on driving\*.

**New Z.E. Trip**  
This new R-Link application enables you to find selected charging points on your journey, with details on availability, opening times, payment method and charging speed\*\*.

Journey planning with ZOE is now easier than ever before, providing you with all the information on charging points you need.

\*For compatible devices, please refer to <https://www.renault.ie/services/multimedia/compatibilite-bluetooth>  
\*\*Z.E. Trip will be available for ZOE customers in the R-Link Store during 2017. Speak to your local dealer for more information.

# New Z.E. 40 battery

The new Z.E. 40 battery was developed by Renault with a revolutionary technology which doubles the capacity of the lithium-ion battery, in exactly the same dimensions! 400 km NEDC\* on one charge, with the same benefits as the 22kWh battery, such as simple recharging, no required maintenance and easy recycling at the end of its life.

Located under the floor to lower the center of gravity, the battery has no impact on either roominess of the car or on the boot volume. ZOE offers 100% torque from start, a quiet motor, no gear changes or petrol stations, **and relaxed driving pleasure.**

# Innovation for a better life

What is the purpose of innovation, if it doesn't offer a tangible benefit?

That's why all of ZOE's innovative features are specifically designed in order to make your electric life even easier.

## 1. Regenerative braking:

Every time the driver brakes, the battery gets a boost of energy. Clever!

## 2. Heat pump:

The heat pump is able to air-condition and heat your car more efficiently than a traditional system, meaning you can stay comfortable without worrying about range.

## 3. EV tyres:

Specifically designed for ZOE, these tyres are able to maximize ZOE's range due to ultra-low rolling resistance technology.\*

## 4. Chameleon Charger™:

Uniquely fitted to ZOE, the Chameleon Charger™ is always able to charge at maximum power available and is therefore quicker and more efficient, saving you time and money.

## 5. Pre-conditioning:

Through Z.E. Connected Services\*\* you can pre-set the temperature of the car so it's ready for you before you get in. Toasty in winter and cool in summer!

## 6. Eco-mode:

When using the eco-mode, the dynamic performance and air conditioning or heating is limited to maximize ZOE's driving range.

\*Homologated range according to NEDC test cycle, for comparison purposes, 400 km, and may not reflect real life driving results. See Driving Range page for more information. Z.E. 40 battery is available on Dynamique Nav and Signature Nav.

\*Not available on 17" tyres. \*\* 3 years free subscription of Z.E. Connect on all models and 1 year free subscription of Z.E. Interactive for Dynamique Nav and Signature Nav. Z.E. Connected Services is compatible with Apple iOS® and Android® devices and available in the App Store and Google Play® Store.

# What makes ZOE so special?

No fuss, zero CO<sub>2</sub> emissions\*, easy to drive - these are all the things we love about Electric Vehicles and all the things that the Renault ZOE stands for. There are many benefits to owning a Renault ZOE, including:

**Revolutionary Range.** It is our goal to make innovation from tomorrow, accessible to everyone today. Which is why ZOE with Z.E. 40 battery now has an NEDC range\*\* of 400 km, and estimated real world range of 300 km in summer and 200 km in winter, getting you wherever you choose to go, even more easily than before.

**Easy Electric Life.** Renault Z.E. makes the electric revolution easy. Providing you with all the basics you need to integrate ZOE into your life, there is nothing left to worry about.

**Chameleon Charger™.** Our innovative Chameleon Charger™ is uniquely fitted to ZOE and makes clever charging possible. As it is always able to charge at maximum power available, it saves you time and lets you make the most of the charging stations you come across.

**Truly Connected.** A connected life is no longer a future scenario. Z.E. Connected Services takes communication between smartphone and car to another level, allowing features such as remote charging, pre-conditioning and monitoring charge status.†

**Style.** We all want style in our lives, and the streamlined appearance and transparent rear lights are some of the features of the ZOE that will ensure you do.

**Low running costs.** Charging ZOE at home is not only easy, but also very cost-effective. With an average full charge costing less than €4†, you will start saving money journey after journey.

\*CO<sub>2</sub>, while driving: 0 g/km, MPG: n/a according to NEDC homologation tests. \*\*Homologated range according to NEDC test cycle, for comparison purposes, 400 km, and may not reflect real life driving results. See [Driving Range page for more information](#). †Features available depend on qualifying subscription. See [Technology and Innovation page for more information](#). † Less than €4 full recharge cost, calculated by (a) Board Gais Energy urban/rural nightsaver Price Plan Unit rate including VAT and (b) a full recharge of the 41kW battery.

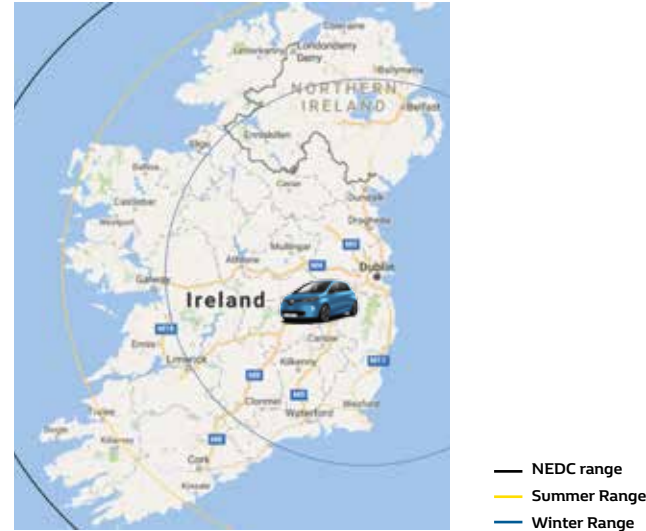

# Driving Range

Now that ZOE is available with Z.E. 40 Battery giving a revolutionary NEDC\* range of 400 km on one charge, range anxiety is a thing of the past. With real life estimates of 300 km in summer and 200 km in winter\*\* ZOE is able to get you wherever you need to go with less need to recharge on the way, saving you time and money.

Range (miles)	Expression Nav R90	Dynamique Nav R90 Z.E. 40	Signature Nav R90 Z.E. 40	Cost in Cents cents/per km†
NEDC*	240	400	400	1 cent
Summer	170	300	300	1.5 cents
Winter	115	200	200	2 cents

**\*What is the NEDC and why does real-life range differ so much from it?**  
The NEDC is a method which can be used for comparing fuel consumption of different models and manufacturers, as the tests put vehicles under the same, ideal conditions. In real life many factors such as your driving style, the type of journey, your speed and the climate affect how far your ZOE will go. This is why we at Renault give you realistic summer and winter figures based on our testing of the vehicle, rather than just the theoretical driving range.

**\*\*Why is the range reduced in winter?**  
Like all batteries, those in Z.E. vehicles are less efficient in cold weather than at warmer ambient temperatures. This means that you can expect a reduction in the range of your Renault Z.E. in the winter. Also, in winter you are more likely to use the heating, which means ZOE consumes more energy.

Illustrated range for ZOE with Z.E. 40 Battery

Charging times	Expression Nav R90	Signature Nav R90 Z.E. 40	Signature Nav R90 Z.E. 40	
7kW (0-100%)	3-4 hours	7-8 hours	7-8 hours	This is the rate a home charging point will most likely be charging at. The majority of your charging will take place here, typically at night. The average adult needs 8 hours of sleep, and same goes for ZOE.
22kW (0-100%)	60 mins	2 h 40	2 h 40	On most journeys, there is no need to fully recharge and you will typically only top-up for half an hour at a motorway station. The perfect excuse for a cup of coffee.
43kW (0-80%)	60 mins	1 h 40	1 h 40	You are expecting many long journeys? Why not consider ZOE with Quick Charge option, which reduces charging time for ZOE with Z.E. 40 battery to 65 minutes. <a href="#">See Quick Charge Page</a>

^ Less than 2 cents/km based upon a €4 full recharge cost, calculated by (a) Board Gais Energy urban/rural nightsaver Price Plan Unit rate including VAT), (b) a full recharge of the 41kW battery and (c) the km on one charge.

# Different Journey and Charging Scenarios<sup>^</sup>

People's daily schedules can be very different. However, ZOE with Z.E. 40 battery can now accommodate even longer journeys.

## Multiple short journeys summer

## 200 km roundtrip trip summer

## 250 km journey winter

**KEY**

- Driving Distance
- Charging Time

## Did you know that...

- ...the average daily mileage is about 45 km\*\*. Even if you drove double that every day, you would not even come close to ZOE's limits.
- ...ZOE's unique Chameleon Charger™ is clever and can adapt to different chargepoints? It is always able to charge at maximum power and is therefore quicker and more efficient. [See Battery and Charging page for more information.](#)
- ...there are many ways to maximize your range? ZOE's smart eco-mode, driver coaching tips, and regenerative braking are able to optimise your driving range.

<sup>^</sup>For illustration purposes only and based on the estimated driving range of ZOE with Z.E. 40 Battery available on ZOE Dynamique Nav and Signature Nav.

\*Homologated range according to NEDC test cycle, for comparison purposes, 400 km, and may not reflect real life driving results. [See Driving Range page for more information.](#)

\*\*CSO Car Usage Statistics – average daily distance private car.

# Battery and charging

Just like the other models in the Renault Z.E. range, ZOE is fitted with a lithium-ion battery, offering great performance. It is very simple to charge, even when it is fully discharged and it can also be recycled at the end of its life.

Thanks to The Chameleon Charger™ that is uniquely fitted to ZOE, it is compatible with various power sockets and sources, providing you with a range of charging options. The result? Minimised charging times and maximised flexibility.

## Three easy ways to charge?

**1. At Home.** - A typical domestic EV charging point offers a 7kW charge that can fully charge the ZOE in 7-8 hours. Now that ZOE with Z.E. 40 battery can go even further, the majority of your charging will take place at home so that topping up the car can be effortlessly integrated into your daily routine.

**2. Destination.** There are already over 1,200 public charging posts in Ireland (including Northern Ireland) that provide a charge between 22kW and 3kW and can charge your car from 3-16 hours respectively. This type of charge is ideal for round trips, such as going to and from one destination.

**3. Quick.** These appliances are placed at key locations such as motorway services and have a 43kW capacity. They are ideal for long journeys and can charge your ZOE with Z.E. 40 battery to 80% in 1h 45 mins. With Quick Charge option, this only takes 65 mins. [See Quick Charge page.](#)

## Not sure where to find chargepoints around you?

Visit [www.esb.ie/our-businesses/ecars/charge-point-map](http://www.esb.ie/our-businesses/ecars/charge-point-map), or download the ESB "ecar connect" app for Apple and Android devices.

# Quick Charge

If you are likely to use your ZOE for long trips on the motorway where 43 kW Quick Chargers are available why not consider ZOE Q90 Z.E. 40 Quick Charge?† The Quick Charge option enables your ZOE to charge from 0-80% in just 65 minutes, and lets you travel further, faster.

Range (miles)	Dynamique Nav/ Signature Nav R90 Z.E. 40	Dynamique Nav Q90 Z.E. 40 Quick Charge	Signature Nav Q90 Z.E. 40 Quick Charge	Cost in Cents cent/per km†	Charging times	Dynamique Nav/ Signature Nav R90 Z.E. 40	Dynamique Nav Q90 Z.E. 40 Quick Charge	Signature Nav Q90 Z.E. 40 Quick Charge
NEDC**	400	370	370	1 cent	7kW	7-8 hours	8-9 hours	8-9 hours
Summer	300	280	280	1.5 cents	22kW	2 hrs 40	2 hrs 40	2 hrs 40
Winter	200	180	180	2 cents	43kW (0-80%)	1 hr 40	<b>65 mins</b>	<b>65 mins</b>

ZOE Q90 Z.E. 40 Quick Charge makes longer journeys even easier.

## 400 km motorway journey summer^

\*Quick Charge is available as an option on ZOE Dynamique Nav and Signature Nav. Quick Charge Option results in an NEDC Range of 370 km and real life estimates of 280 km in summer conditions and 180 km in winter conditions.

\*\*Homologated range according to NEDC test cycle, for comparison purposes, 370 km, and may not reflect real life driving results. See [Driving Range](#) page for more information.

† Less than 2 cents/km based upon a €4 full recharge cost, calculated by (a) Board Gais Energy urban/rural nightsaver Price Plan Unit rate including VAT), (b) a full recharge of the 41kW battery and (c) the km on one charge.

^For illustration purposes only and based on the estimated driving range of ZOE with Z.E. 40 Battery and Quick Charge Option.

# Standard features

## EXPRESSION NAV

AEROBASE - 15" wheel trims

Expression upholstery

### EXTERIOR STYLING

- 15" AeroBase wheel trims

### INTERIOR STYLING

- TFT dashboard display with driving style indicator

### DRIVING AND CONTROLS

- ABS with EBA (Emergency Brake Assist) and EBD (Electronic Brakeforce Distribution)
- Cruise Control and speed limiter
- ESC (Electronic Stability Control)
- ETC (Electronic Traction Control)
- Keycard entry with push button Start/Stop function

### COMFORT AND CONVENIENCE

- Automatic climate control with one touch quick demist function
- Height and reach adjustable steering wheel
- Electric windows - front

### COMMUNICATION AND ON-BOARD TECHNOLOGY

- USB socket and AUX socket
- 4x20W Renault R-Link Multimedia system including 7" touch screen, TomTom® LIVE navigation, FM tuner, Bluetooth®\*\* audio streaming and hands-free calls, and voice control
- ECO mode function

### SAFETY AND SECURITY

- Driver and front passenger front and side airbags
- Z.E. Voice (low speed pedestrian warning)

### Z.E. SPECIFIC EQUIPMENT

- Chameleon charger with a charging time of between 1 and 13.5 hours depending on power supply
- Heat pump
- 15" Michelin ENERGY E-V tyres
- Z.E. Connect (remote monitoring of battery charge and estimated range) 3 years' subscription free as standard for all versions. Renewal required after 3 years\*\*

\*For compatible devices, please refer here: <https://www.renault.ie/services/multimedia/compatibilite-bluetooth>

## How it works - ZOE battery

---

Whether you choose the 22 kW/h battery, or the new Z.E.40, ZOE pricing now includes the battery. This keeps purchase and ownership as straightforward as possible.

For your peace of mind, the battery is guaranteed for 8 years / 160,000 km (whichever comes first). This includes the battery performance guarantee to at least 66% of its original capacity.

For prices, please refer to the Renault Car Price list, available at your local dealer and on [www.renault.ie](http://www.renault.ie).

## How it works - SEAI grant

---

It is Ireland's target under the Renewable Energy Supply Directive to make sure that 10% of its transport energy comes from renewable sources by 2020. Naturally electric vehicles have a big part to play in reaching that target. Ireland has substantial resources of wind and ocean energy and electric vehicles are a great way to use this energy in order to significantly reduce its CO<sub>2</sub> footprint. This is why the SEAI supports EV customers with grants, reducing purchase prices and the cost of charge point installations. In addition to this, with Ireland's mild temperatures throughout the year, electric vehicles are made compatible with a wide range of driving needs. So what are you waiting for?

Find out more online on [www.seai.ie](http://www.seai.ie).

● = Standard (therefore no cost) ○ = Optional - = Not available (1) 80% battery charge from a rapid-charge terminal (2) Not available with the 17" aluminium alloys \*Homologated range according to NEDC test cycle, for comparison purposes and may not reflect real life driving results. See [Driving Range page for more information](#). \*\*Non- EV tyres can influence the autonomy of the car. The official NEDC driving range is 367 km (R90) and 340 km (Q90). Homologated range according to NEDC test cycle, for comparison purposes and may not reflect real life driving results.

# Dimension diagrams Technical specification

BOOT VOLUME (litres)	
Boot height under shelf	338
Boot with rear seat folded	1,225

DIMENSIONED DRAWING (mm)	
<b>A</b> Wheelbase	2,588
<b>B</b> Overall length	4,084
<b>C</b> Front overhang	839
<b>D</b> Rear overhang	657
<b>E</b> Front track	1,511
<b>F</b> Rear track	1,510
<b>G</b> Overall width on moulding strips/with wing mirrors	1,730 / 1,945
<b>H</b> Unladen height	1,562
<b>H1</b> Unladen height with tailgate open	2,028
<b>J</b> Unladen boot sill height	724
<b>K</b> Ground clearance, laden	120
<b>L</b> Cabin length	1,678
<b>M</b> Front elbow width	1,384
<b>M1</b> Rear elbow width	1,390
<b>N</b> Front shoulder width	1,365
<b>N1</b> Rear shoulder width	1,320
<b>P</b> Front headroom at 14°	904
<b>Q</b> Rear headroom at 14°	826
<b>Y</b> Maximum boot entry width	941
<b>Y1</b> Lower boot entry width	899
<b>Y2</b> Interior width between wheel arches	1,037
<b>Z</b> Boot opening height	685
<b>Z1</b> Maximum loading length with rear bench seat folded	1,426
<b>Z2</b> Height under shelf	622
<b>Z3</b> Length of load behind seats	580

(1) Homologated range according to NEDC test cycle, for comparison purposes and may not reflect real life driving results. (2) The official NEDC driving range is 367 km (R90) and 340 km (Q90). Homologated range according to NEDC test cycle, for comparison purposes and may not reflect real life driving results. (3) Fuel consumption and emissions measured in accordance with applicable regulations.

# Renault Services

**RENAULT BANK**  
We Bank. You Drive.

Renault Bank, choose the finance solution that best suits your needs.

At Renault Bank, we pride ourselves on being:

- **Flexible.** We have flexible payment plans. We can tailor the term, the deposit or the repayment to meet your needs.
- **Competitive.** We offer competitive rates and attractive financial packages you will not find anywhere else.
- **Simple.** We provide an easy application process, quick decision and minimum paperwork, all at your Local Dealer.
- **Creditable.** We are part of one of Europe's largest motor finance companies and offers financial services to millions of customers everyday.

Renault Bank is a trading name of RCI Banque Branch Ireland, a wholly owned subsidiary of the Renault Group. RCI Banque is regulated by the French banking authority and is supervised by the Central Bank of Ireland for conduct of business purposes.

## Renault Warranty

Renault ZOE comes with a 5 year / 200,000km Renault manufacturer warranty.

The battery is guaranteed for 8 years / 160,000km (which ever comes first). This includes the battery performance guarantee to at least 66% of its original capacity.
